Information Governance & Integrity

Description

1. Identification of (relevant) information
2. Definition of key processes
    a. Information/data ownership
    b. Access rights
3. Process verification and monitoring (see theme "Digital Trust")
4. Proving the integrity (see theme "Investigation of cyber attacks")

Ideas

- Case Metso + pilot
- Access guidelines
- Processes
- Asset management
- Can process be used as a way to protect information?

Questions

- TBD

Research questions

Industrial partners

Organization*	Contact person	Role & contribution
Huoltovarmuuskeskus?	Kalle Luukkainen?
